## NEW SERVICE :

### CITY CENTRES TRANSPORT - PLANNING AND ORGANIZING

- ❑ **Elaboration concept for Lwówek Śląski** – basic criteria were e-Tream project assumptions, concerning rational and sustainable aspects with the transport issues.
- ❑ This concept mainly gives solutions for bike and pedestrian locomotion development. The first one is bike parks and path systems for pedestrians and bicycles implementation. Next important issue is restrictions planning for city center accessibility through appropriately streets closure for car traffic.

Transport system - Lwówek Śląski

## NEW SERVICE :

### CITY CENTRES TRANSPORT - PLANNING AND ORGANIZING

- ❑ This service development includes also cooperation with specified actors. Until today we have had interest from : municipality governments , communes, Marshal Office, Voivodeship Government.
- ❑ In service framework, DAES organized on 15th of April 2008 seminary about sustainable transport planning in communes and municipalities. In seminary take part 60 people.
- ❑ Moreover University of Nature has found its area of interest in this subject , and has declared future cooperation.

Seminary 15.04.2008

## NEW SERVICE :
